YIU CHUNG TSE, STEPHEN

Game Programmer

About Me

As a passionate and adaptable software developer with several years of hands-on experience in game and app development, I am eager to contribute my skills to Canada's tech industry. My background in Unity, database integration, and full-cycle app development allows me to bring strong technical value to any project. I am currently based in Canada and open to new opportunities where I can continue growing professionally as a software programmer.

Experience

2025 – Present

Personal Project: Home Automation & Finance Sync

Self-Directed, Winnipeg, Canada

- Built a self-hosted Python service using IMAP IDLE to monitor bank transaction emails and sync parsed transactions to a budgeting app's REST API, replacing a legacy Google Apps Script workflow; deployed as an isolated Docker container per account on a Synology NAS
- Manage broader self-hosted infrastructure: Docker, reverse proxy/DDNS, router/NAS network segmentation, and Tailscale VPN fallback

2023 – Present

Store Associate

Sun Wah Supermarket, Winnipeg, Canada

- Provide assistance to customers in a fast-paced retail environment
- Maintain product displays and ensure inventory is properly stocked
- Communicate effectively with a diverse customer base in English, Cantonese, and Mandarin
- Deliver goods to local restaurants and stores, ensuring timely and accurate order fulfillment

2021 – 2022

Junior Analyst Programmer

Makeitfun Studio Limited, Hong Kong

- Develop interactive web game from PlayCanvas with Socket.IO for shopping mall product launch event
- Maintain and fix bugs in launched apps
- Implement APIs to generate student records report based on database data

2020 – 2021

Mobile App Developer

Innoduction Group INC Ltd., Hong Kong

- Database and architectural design based on project requirements
- Build iOS and Android applications with Unity
- Analyze and integrate database data to generate reports based on client's requirements
- API implementation for application development and report generation
- Debug and fix crashes and platform-specific problems
- Develop interactive ebook and assessment platform for schools

2018 – 2020

Game Programmer

TBS Interactive Limited, Hong Kong

- Develop interactive photo/video booths, motion tracking games, single or multi-touch games, and Arduino-powered interactive games for product launch events, retail stores, exhibitions, and malls
- Working with other programmers and artists in order to create strong prototypes that prove design ideas
- Troubleshooting and fixing bugs on existing projects
